

Dear Anneliese,

I am pleased to offer my endorsement for your soffit vent product. As a leader in the energy efficiency industry, I am familiar with the challenges and problems our industry has yet to face and/or solve. Your product effectively solves one of these long-standing problems: safely and effectively venting a bathroom exhaust fan to a soffit. The design will also eliminate the need for unsightly vents through the siding or roof.

Should your product perform the way its design intended, I fully support its use in residential new construction projects and existing home retrofits.

Peter Grynage
